## EDUCATION

|                                                      |               |           |
|------------------------------------------------------|---------------|-----------|
| COLLEGE EDUCATION -Sri Eshwar College of engineering | 7.63(Vth-sem) | 2023-2027 |
| SCHOOLING—Orison Academy                             | 73.6%         | 2021-2023 |
| SCHOOLING—Vivek Vidya Mandir                         | 88.6%         | 2020-2021 |

## INTERNSHIP EXPERIENCES

### BETTER TOMORROW 2024

Gained knowledge on how to work on MongoDB, Express, ReactJS and NodeJS. It helped me to develop projects using MERN. This internship was offered by the Better Tomorrow Training Institute.

### RAMPEX 2024

Gained hands-on experience in DevOps tools and practices during an internship at Rampex Technologies. Worked with Jenkins, Docker, SonarQube, Git, and AWS to implement CI/CD pipelines, automate deployments, and enhance application monitoring and code quality.

### SKILLS ACQUIRED:

**Frontend** : HTML, CSS, JavaScript, ReactJS, TailwindCSS, Bootstrap

**Backend** : Node.js, Express.js, REST APIs, MongoDB, MySQL

**Cloud** : AWS EC2,Serverless (Lambda), S3,CI/CD,Docker

## PROJECTS

### Budget Buddy [Github](#) December 2025

**Tech Stack** : Java (Spring Boot, JVM), eBPF, Hikari pool, Prometheus, Grafana, Loki

Developed a MERN-based finance tracker application to manage income, expenses, balances, and transaction history with an interactive monthly calendar interface for efficient budgeting, financial planning, and real-time personal finance monitoring.

### Smart Smoke Detection [Github](#) August 2024

**Tech Stack** : ESP8266,MQ-135,Servo Motor,Buzzer

Built a cost-effective IoT-based fire safety system using ESP8266, MQ-135, servo, and buzzer to detect harmful gases and trigger real-time alerts and sprinkler activation. Integrated ThingSpeak/Firebase for monitoring; showcased at Mini project Expo 2025 with planned future upgrades.

### Smart DustBin [Github](#) December 2024

**Tech Stack**: Arduino UNO, Ultrasonic Sensor, Wi-Fi Module, Buzzer

Designed an IoT-based smart bin system that uses ultrasonic sensors to monitor garbage levels in real-time. Sends automatic notifications to sanitation workers for timely collection, minimizing overflow and improving urban cleanliness. Suitable for smart city waste management.

## ACHIEVEMENTS

**Research Paper Published on ICRTICC - 2025 | Galgotias College of Engineering and Technology** 2025

**Winner of TEXPERIA's Paper Presentation – 2026 | SNS College of Technology**

## CODING PROFILES

Leetcode- Global Rank: 1,357,760| Problems Solved : 115 | Profile Link: [LINK](#)

## CERTIFICATIONS

|                                               |           |      |
|-----------------------------------------------|-----------|------|
| Understanding Incubation and Entrepreneurship | NPTEL     | 2026 |
| Responsible & Safe AI Systems                 | NPTEL     | 2025 |
