PROJECTS

Expirix – Smart Expiry Tracking Web Application

[Github](#)

August 2025

Tech Stack : ReactJS, Node.js, Express.js, MongoDB

Developed Expirix, a smart expiry tracking web application for monitoring perishable inventory with real-time product management, color-based expiry indicators, secure authentication, and an interactive dashboard to minimize product waste efficiently. Implemented dynamic inventory management features for adding, updating, and categorizing products based on expiry status. Designed a responsive user interface with efficient dashboard visualization for improved usability and inventory tracking.

CrowdSpark – Crowdfunding Platform

[Github](#)

December 2024

Tech Stack: MongoDB, Express.js, ReactJS, Node.js, JWT Authentication

Developed CrowdSpark, a crowdfunding platform with secure campaign management, JWT-based authentication, real-time fundraising tracking, and responsive user interaction for seamless collaboration between creators and supporters. Integrated RESTful APIs and secure authentication mechanisms for reliable campaign and user management. Built responsive dashboards and interactive campaign pages to enhance user engagement and fundraising experience.
